# WELCOME TO

## The 2023 OurCrowd Global Investor Summit

On behalf of the OurCrowd team, I thank you for joining us today. After a global pandemic that postponed the Summit for two straight years, we are gratified to gather the startup world once again.

As always, you'll find incredible technologies on display onstage and on the exhibition floor, you'll meet and hear from the entrepreneurs behind those technologies, as well as the global spectrum of players who support them. The Summit is a microcosm of the global network that is changing the world for the better, and your presence today gives you an unparalleled opportunity to learn, grow, collaborate, and invest.

The Summit is never business as usual, of course, and much has changed. With the signing of the Abraham Accords, we have seen historic normalization agreements between Israel, the UAE, Bahrain, Sudan and Morocco. The fall of the Sand Curtain has brought about a new age of collaboration and opportunity which will be evident throughout Summit Day, including exhibitions, speakers, and large delegations from these countries who never had the chance to work with us before.

One piece of advice. In response to past input, we've expanded lunch to two hours, with some breakout sessions scheduled during that time – so please peruse the agenda and session descriptions and plan your day well. The great programming runs right to the end of the day, and you won't want to miss a thing.

And when it's all over, I look forward to sharing a drink with you at our wonderful ShukTech after-party in the open-air Mahane Yehuda market after the Summit, where we will have food, drink and live music late into the night.

Warm regards,

# THE ARC GLOBAL ECOSYSTEM

## ACCELERATING INNOVATIONS IN HEALTHCARE

The healthcare sector is in dire need of a revolution that would lead to more sustainable solutions. With the goal of spearheading this, Sheba Medical Center, Israel's largest hospital that has been recognized as being among the top 10 in the world by Newsweek for four consecutive years since 2019, launched ARC. ARC Innovation at Sheba Medical Center accentuates a unique strategy, one that Accelerates innovation and Redesigns healthcare by Collaborating with partners, and it encompasses a global ecosystem that aims to develop, pilot, and roll out game-changing solutions. It prioritizes innovations in digital health as a transformational vehicle and promotes an open innovation environment. While uniting leading academic medical centers with innovative startups and strategic industry partners, ARC drives forward rapid development and implementation through data sharing and streamlined collaborations.

The ARC ecosystem now includes leading academic medical centers in North America and Europe, such as The Ottawa Hospital, Mount Sinai, Mayo Clinic, Thomas Jefferson, Henry Ford Health System, Cedars-Sinai, Cincinnati Children's Hospital Medical Center, and University Hospital Zurich. Strategic industry partners include Microsoft, Allscripts, Boston Scientific, Janssen, Merck, Takeda, AstraZeneca and others. Moreover, there are already over eighty leading startups hand-selected for their capacity to make a positive impact. They focus on artificial intelligence, precision medicine, and telemedicine within the realm of digital health as well as pharma and medical device companies.

To fund new developments, Sheba has partnered with Triventures, a US-Israeli venture capital firm, to launch a fund called Triventures ARC (TV ARC). The fund already made a few investments in companies that demonstrate a strong potential to contribute to ARC's mission.

ARC's mission is to transform healthcare delivery and improve patient care through innovation. We welcome your organization to join us in this journey.

### EYAL ZIMLICHMAN, MD, MSC

Professor Eyal Zimlichman serves as Chief Transformation and Innovation Officer at Sheba Medical Center. Previously, he held the position of Lead Researcher at Partners HealthCare's Clinical Affairs Department in Boston and was heavily involved in the efforts to implement a strategic care redesign initiative there. Over the years, Professor Zimlichman has served on several advisory committees commissioned by the Office of the National Coordinator for Health Information Technology at the U.S. Department of Health and Human Services and is chairing as well as participating in several committees at Israel's Ministry of Health.

Professor Zimlichman is the founder and director of Sheba's ARC innovation program. He is board certified in internal medicine, completed a degree at the Harvard T.H. Chan School of Public Health, and earned his MD at the Technion Israel Institute of Technology.

JITRI, Jiangsu Industrial Technology Research Institute, was founded in Nanjing, Jiangsu in 2013. With support from the Shanghai municipality, Jiangsu, Zhejiang and Anhui provinces, the JITRI team is committed to building an industrial technology innovation ecosystem in the Yangtze Delta region of China. This was achieved by integrating JITRI and the Shanghai Yangtze Delta Innovation Institute in a seamless management system. Under the JITRI umbrella, there are more than 15,000 research staff engaged in applied R&D and technology transfer, which are operated and managed by more than 210 personnel in two headquarters, located in Shanghai and Nanjing.

**JITRI was founded in Nanjing, Jiangsu, and now encompasses the Yangtze Delta region:**

- One of the most economically developed and innovative regions in China
- Accounts for 24% of national GDP, 30% of national R&D spending, and 8%+ of the global manufacturing output
- #1 destination for foreign direct investment into China\*

**JITRI's ecosystem consists of R&D platforms, industrial demands and innovation resources:**

- 92 application-oriented research institutes and innovation platforms
- 279 joint innovation centers with influential and leading enterprises
- 76 international strategic partners of top universities, high-tech companies, and international organizations

\*According to the UN Statistics Division (2022) and the National Bureau of Statistics of China (2022)

**Universities & Research Institutes**

Supporting overseas partners to carry out R&D, training, and technology transfer in partnerships across the Yangtze Delta region of China.

**Start-up Teams & High-tech Companies**

Incubating and investing in overseas teams to set up institutes and enterprises; Enabling asset-light business models, protection of IP, and market introduction.

Facilitating overseas high-tech SMEs to land in China with local partners; Reducing risk by validating technology, teams, and markets.

JITRI helps its partners identify and fill technology gaps using global resources. For example, a heparin biosynthesis joint development project worth 3 million USD has been successfully implemented by a spin-off company from the University of North Carolina at Chapel Hill.

### Technology for Good - Contributions to Addressing Global Challenges and Promoting Sustainable Development

By adding social care to technology, we create a new technology that provides solutions for our planet's aging populations.

<https://projects.iq.harvard.edu/hstga>

To address the challenges of aging populations, JITRI collaborated with Harvard University to initiate the Social Technology for Global Aging (STGA) in 2021. With 6 of Harvard's schools and 40+ researchers, the STGA focuses on developing innovative technologies for eldercare.

Since 2019, together with Fraunhofer-Gesellschaft, JITRI has hosted the Secretariat of the World Association of Industrial and Technological Research Organizations (WAITRO), helping advance the UN Sustainable Development Goals through cross-border cooperation.

# ABOUT OURCROWD

OurCrowd is the online global venture investing platform that empowers institutions and individual accredited investors to invest and engage in emerging technology companies at an early stage. Acclaimed by PitchBook as the most active venture investor in Israel every year since 2013, OurCrowd vets and selects companies across all sectors and stages, invests its own capital, and provides its global platform of over 220,000 registered members from 195 countries with unparalleled access and freedom to co-invest from as little as \$10,000 in the companies and funds of their choice.

Founded by CEO Jon Medved in 2013 with the vision of democratizing world-class venture capital investing, OurCrowd has grown rapidly into the world's leading online venture investing platform and as of 2023 has over \$2.1 billion in commitments, and deployed capital into 380 portfolio companies and 42 funds across five continents. To date, OurCrowd's startups have recorded 61 exits including several stock market listings: Beyond Meat, Lemonade, Innoviz, Hub Security; and numerous high-profile acquisitions: JUMP by Uber, BriefCam by Canon, Argus by Continental, Crosswise by Oracle, Replay by Intel, Corephotonics by Samsung, CyberX by Microsoft, and Kenna Security by Cisco.

OurCrowd builds value for its portfolio companies throughout their lifecycles, providing mentorship, recruiting industry advisors, navigating follow-on rounds and creating growth opportunities through its network of multinational partnerships.
